 - CSS3 — SASS / SCSS
 - HTML5 — Bootstrap, Material
 - PHP — Code Igniter
 - Github
 - NodeJs
 - WordPress — Themes, Plugins, E-commerce
-

EXPERIENCE

At the age of 19 i started engineering for a bachelor's degree only starting to work fulltime as a web developer at the age of 23, now a days i work mainly as a front end working mainly on web applications. I am currently working full time as a jr at an agency from Rio de Janeiro - Brasil called WDA.AG Agência Digital. I've also done a lot of remote and freelance work for digital products for both business and consumer use. I'm quietly confident, naturally curious, and perpetually working on improving my knowledge and skills.

MAIN ABILITIES

- I currently build over 3 web applications per month, focusing on design with a nice touch of animation.
- Working on a chrome extension as a personal project, for WhatsApp user security, using only JavaScript and different styles of templates.
- Built a music mixer for dj's so they could create their songs on the web using only HTML5, CSS3 and JavaScript.
- Developed a few e-commerce.
- Building a Angular App that is kinda like instagram and tinder combined.
- Developed a few WordPress plugins, this helped out the company getting better speeds and flexibility for different designs.

INTERESTS

I really enjoy improving my skills as a software engineer, trying to learn and evolve a little every day.
